

SMART MEDICAL CLEARANCE FORM

COVER SHEET

The [SMART Medical Clearance form](#) was developed by emergency medicine and psychiatry specialists and uses an evidenced-based algorithm to implement a standardized and streamlined medical clearance process. The purpose of the SMART form is to standardize the process of transferring between providers in Alaska, eliminate barriers to admission, and reduce testing that is not medically indicated.

The SMART form can be used in any admissions/transfer.

This optional cover sheet includes information specific to psychiatric admissions in Alaska.

Psychiatric Admissions	Notes*
Other considerations:	
Patient age	
Current location	
When patient arrived at facility	
When patient was placed on hold (MC 105)	
When patient was placed on hold (MC 100 ex parte)	
Is the patient likely to stabilize in the next 48 hours?	
Has patient needed PRN medication(s) for their psychiatric symptoms?	
If so, when was last administration?	
Has patient needed physical restraints? If so, when was last use?	
Does patient require medical equipment (wheelchair, walking, oxygen, etc.)	
Does patient have any additional nursing needs (e.g. wound care)	
Communicable infectious disease (lice, scabies etc.)	
Is this patient high risk for syphilis or hepatitis C?	
Other clinical conditions not listed	

**Documentation of rationale must be reflected in the medical record.*
